

Reliability, Sustainability, Innovation

*A global team of 150 people: engineers, manufacturers and above all **advisors for cooling, refrigeration and wastewater treatment technologies.***

We serve both industrial and the civil sector. The same mission: to always be by your side, from design to after-sales.

Since 1960 MITA Cooling Technologies has been developing, manufacturing and marketing **cooling systems**: cooling towers and evaporative condensers, adiabatic dry coolers, subcoolers. Not only manufacturers of industrial solutions: MITA acts as a cooling advisor in all phases of a plant design.

Since 1995 the Frigofluid team has been designing and manufacturing systems for temperature control in industrial processes: **chillers for process fluids**, industrial dry coolers, temperature controllers, turnkey systems.
